NIC# 04572-86  
1 October 1986

MEMORANDUM FOR: Chairman, National Intelligence Council

FROM: MG Stephen E. Nichols, USA  
National Intelligence Officer for  
General Purpose Forces

SUBJECT: IIM: Soviet Anti-Armor

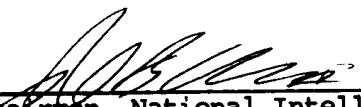

1. You may recall our recent discussion of current GPF production during which I mentioned the above referenced IIM and the fact that it had originated as a part of another document which has been published. I also indicated that the anti-armor document, in its present state, is not suitable for publication and would have to be completely re-worked.

2. Further investigation indicates that the content of this draft is readily available in a number of community publications and, therefore, there no longer appears to be any requirement for the IIM. Several ongoing projects in the community will more than adequately illuminate this subject. Accordingly, I recommend that this IIM be removed from the NIC production schedule and the data be provided to NIO/S&T for any use he may be able to make of it.

Stephen E. Nichols
